## STS of NJ Annual Conference and Membership Benefits for Mechanics/Fleet Managers

Signing up your mechanic/fleet manager for a professional association can be a difficult choice to make for an administrator without knowing the value of the membership. Below are just a few of the benefits of joining STS of NJ for a mechanic/fleet manager:

- In person technical training
- Face to face networking with peers from all regions of the state
- Networking opportunities with new vendors
- Opportunity to experience emerging technologies, as well as the chance to ask questions of the companies bringing them forward
- Will establish them as a part of the STS community
- Opportunity to advance their skills as a manager/leader by participating in STS Supervisor courses offered at the annual conference
- Interact with Department of Transportation & Motor Vehicle Commission officials
- Future training opportunities in regional areas (North, Central, South)

The benefits are not just limited to what is above. With the ever-changing technology on our school vehicles training is 100% necessary to stay in the front of the evolving industry. With alternative fuels and electrification moving forward rapidly, and diagnostic capabilities more complicated than they have ever been, education is the foundation for success. If membership is not right for your district at the moment, your employee will still be able to attend our annual conference in Atlantic City, NJ every March by purchasing a conference registration. The 3 day conference will have a vendor show, networking events, and multiple training opportunities. The cost of the conference/membership is minimal compared to the benefits your employee and district will receive from participating. If you have questions please contact Chris Verdi, Mechanics Chair at [cverdi@sussexcoop.org](mailto:cverdi@sussexcoop.org).

Thank you.

Sincerely,

Janine Byrnes  
President

Chris Verdi  
Mechanics Chair
